

HOW TO FIND A MOVIE/DVD/TV PLAYING ON THE SMS MEDIA CENTER NETWORK:

1. Open Applications Folder --> find VLC (looks like an orange parking cone) and Open
2. From the VLC menu click **File** → then click **Open Network**
3. Make sure that the **Network tab** is selected at the top (you'll see File/Disc/Network/Capture tabs) and enter the following in the URL text box: <mms://10.101.1.4:8080>
 - The ending of **8080** denotes channel 1, substitute this string with the following to select the different channels:
 - Channel 1 → **8080**
 - Channel 2 → **8081**
 - Channel 3 → **9090**
 - Channel 4 → **9091**(again, just change the last 4 digits at the end of the URL and you've changed the channel!)
4. **Click the Open button** -- whatever the Media Center has playing on that channel (DVD or a TV channel) should be playing!
